

UNIQUE SPECIES EXHIBITION
March 2020. Japan

Déborah Abizanda

Japan Project: Unique Species Exhibition

Like a sea garden, I would like to share my particular vision of an imaginary sea, with "Unique Species".

A mix of coral reef bouquets, flowers, sea rocks and jellyfishes. I already feel like one of them during my 40 days in Seto City making an artist-in-residence programme.

A strange and incredible mix of feelings and experiences, that I wanted to express across my artworks.

The flower that inspires me is always the Japanese Camellia, in honor to Seto and Japan. Delicate Tsubakis that already accompany my unique creatures in this beautiful sea garden.

UNIQUE JELLYFISH

Porcelain, wool, gold and platinum powder (kintsugi technique)

H. 64 cm / 46 cm /41 cm

2019

UNIQUE JELLYFISH

WRITE IN THE SEA
Porcelain, Whasi paper and gold
D/W 86X60 cm
2019

Seto City Art Museum
Seto, Japan

BIO

The work of Déborah Abizanda follows two routes, which she likes to make compatible and which allow her to enjoy her work daily. One is the functional route, where you can find crockery, pots, vases, lamps and plates.

The other is the artistic route, where her special porcelain Bouquet vases stand out. A mix of design and art.

She has done her first solo exhibition in Madrid (May'19).

She gets inspiration from Art Nouveau, Japanese art and Nordic design to create her art works. Porcelain has become the main material she is exploring now. She has fallen in love with it, the white colour and its translucent properties. Nevertheless, she is very interested in testing and mixing other materials like glass, that allow her to express and move through transparency, sensitivity and light.
